Figueira da Foz, Portugal

crsth-n-slv.github.io/portfolio

Product Designer specialized in multi-platform **Design Systems**. Since 2016, I've designed scalable systems used by millions — defining **foundations, tokens, and component libraries** that speed up delivery, ensure **accessibility (WCAG)**, and improve consistency. Skilled in **cross-functional collaboration, UI engineering alignment**, and **system governance**. Passionate about bridging design and code to deliver cohesive, high-impact experiences.

Core strengths

- Design Systems in Figma: components, variants, tokens, styles, libraries, and governance
- Component thinking: decompose features into reusable primitives and patterns
- Handoff and specs: precise properties, states, redlines, tokens, and interaction notes
- Developer collaboration: pair on implementation, align on API and accessibility
- Accessibility: WCAG-aware decisions, focus states, keyboard flows, contrast and tap targets
- Information architecture and flows: clear, constrained UX within DS guidelines

Experience

UX/UI Designer — Capgemini | 2023 – Present

Design System Designer for Instituto de Informática da Segurança Social (Portugal)

- Designed and maintained the **Design System** for Instituto de Informática da Segurança Social (Portugal), ensuring **100% WCAG 2.1 AA compliance**, enabling official accessibility certification.
- Delivered a unified **Figma library with 70+ reusable components and modules**, each standardized with tokens, variants, and documentation.
- Reduced **designer effort by 60%** and **developer hours by 45%** through scalable componentization and precise implementation specs.
- Partnered with **Vue.js engineers** to define component APIs, tokens, and accessibility patterns aligned with front-end frameworks.
- Authored **implementation-ready documentation** covering states, responsive behavior, and ARIA roles, fostering seamless design-to-dev collaboration.
- Conducted **training sessions and office hours** that drove adoption and ensured consistent usage across multiple product teams.

Product Designer — Abler | 2022 – 2023

- Built and maintained the product's design system in Figma and supported migration to a shared library.
- Translated user research and product constraints into DS updates and new components when justified.
- Improved existing flows and interfaces while keeping alignment with DS standards.
- Delivered developer-ready specs, participated in grooming, and validated UI in staging.

Lead UX/UI Designer — MPX Brasil | 2018 – 2021

- Directed the UX/UI strategy for **public-sector digital platforms serving 100+ municipalities across Brazil**, improving government–citizen communication.
- Built and maintained the company's **Design System and standardized delivery processes, doubling designer productivity** through reusable components, templates, and governance workflows.
- Introduced **standardized handoff and delivery protocols**, ensuring faster iteration cycles and consistency across multidisciplinary teams.
- Led the **accessibility transformation** of all company products, achieving **95% WCAG compliance** across digital platforms.
- Collaborated daily with developers to ensure accessible, high-performance, and visually cohesive interfaces.

UI Designer — Earlier roles

- Delivered websites end-to-end: discovery, flows, UI screens, and assets.

Education

 **MBA, Product Management — Descomplica (2023)**

 **Product Design — Unicesumar (2019 – 2021)**

Skills

- | | | |
|---|--|--|
| • Figma libraries, components, variants, autolayout, tokens, styles | • Storybook alignment and component API definition | • Accessibility (WCAG), keyboard and screen reader flows |
| • Design tokens and theming | • Information architecture and user flows | • Agile rituals and stakeholder communication |
| • Documentation and specs | | |
